

1. Ideas

- What is the GDP of Country?
- Is GDP increasing? *over years*
- Is GDP decreasing? *over years*
- NPL of a Country?
- Is NPL increasing? *over years*
- Is NPL decreasing? *over years*
- What is the poverty index of a Country?
- Is the poverty index decreasing? *over years*
- Is the poverty index increasing? *over years*
- Which Countries to focus on?
- Which year / years to target?
- Is there a relationship between GDP \leftrightarrow NPL \leftrightarrow PI?
- Why is there an increase in GDP?
- Why is there a dip in GDP?
- Why is there a rise / fall in NPL?
- Top 10 Countries with max GDP
- Top Countries with max NPL
- Top Countries with max PI

2. Filter

- Why is there a dip in GDP?
- Why is there a rise in NPL?
- Which Countries to focus on?
- Which year to target?
- Is there a relationship between NPL, GDP, PI?

Charts for same Country

3. Categorize

GDP (□)	NPL (△)	PI (○)
Countries	Countries	Countries
Year	Year	Year

Countries: 10-15
 Year: 2000 - 2017.
 Regions: where Countries belong
 Income Zone: Countries.

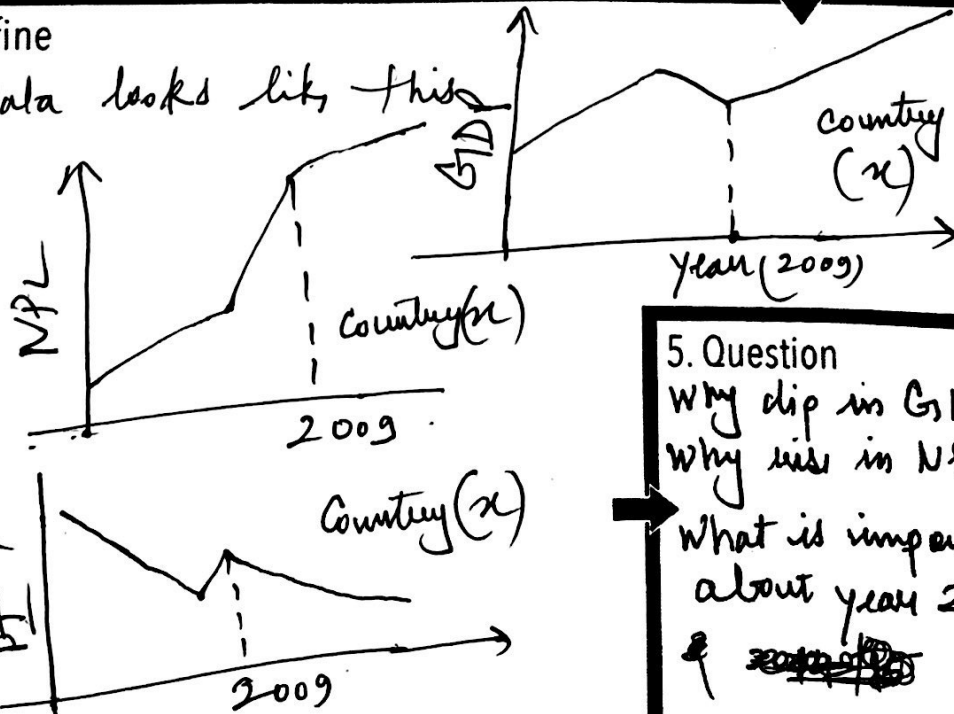

4. Combine and Refine

If GDP data looks like this

NPL data

Poverty Index

Charts for the same Country

5. Question

Why dip in GDP?

Why rise in NPL?

What is important about year 2008/09?
